

Software, designed and engineered end to end.

BaDjR Tech designs and builds custom digital products for organizations without an in-house development team — from discovery and design through engineering, launch, and ongoing support. Every project is scoped and shipped by the two co-founders themselves.

Founded 2024 · Maryland / DC / Northern Virginia · Live products in daily client use

Working with nonprofits, civic organizations, associations, small agencies, and growth-stage teams

WHAT WE BUILD

Web apps & platforms

Portals, dashboards, booking and scheduling systems, directories, and internal tools built around how you actually operate.

Also: marketing sites · e-commerce · APIs & integrations · data migration · design systems · hosting & maintenance

Membership & learning

Member portals, course and community platforms, gated content, role-based access, and recurring billing.

Operations & automation

Invoicing, intake and approval workflows, reporting, payments, and integrations with the tools you already use.

IN MARKET

LIVE & IN USE

CUSTOM BUILD · LIVE

Community booking

Space and services reservation platform for a community center — room and resource scheduling, real-time availability, and member access, in daily use by staff and residents.

CUSTOM BUILD · LIVE

Contractor invoicing

Invoice submission, tracking, and approval for 1099 contractors — replacing manual spreadsheet and email workflows with a single auditable system.

CUSTOM BUILD

Membership & learning

Course delivery and membership management with enrollment, gated content libraries, progress tracking, and recurring subscriber billing.

HOW WE WORK

Founder-built

Shipped by the same two people. No hand-offs, no overhead.

Mission pricing

Civic, nonprofit, and growth-stage tiers priced for the work you do.

Modern stack

React and Vite. Fast, maintainable, and built to scale with you.

Let's build something.
